PROFESSIONAL SUMMARY

Motivated final-year Computer Science and Engineering student with project experience in Python, web development, databases, and machine learning. Developed a real-time collaborative coding workspace and a distributed log analysis project. Completed virtual internships and contributed to a published research paper on an IoT-based home automation system.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, SQL, JavaScript
- **Web Development:** HTML5, CSS3, Flask, Flask-SocketIO
- **Core Computer Science:** Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, Computer Networks
- **Databases:** SQLite, MySQL
- **Machine Learning and Cloud:** Machine Learning, Data Preprocessing, Model Evaluation, Cloud Computing
- **Tools:** Git, GitHub, VS Code, Linux, Google Colab

EDUCATION

B.Tech in Computer Science and Engineering — **2023 – 2027**
Ashokrao Mane Group of Institutions, Kolhapur — *CGPA: 7.0 / 10*

Diploma in Computer Science and Engineering — **Completed**
Rajarambapu Institute of Technology, Sakharale — *80.11%*

Secondary School Certificate (SSC / 10th) — **Completed**
Maharashtra State Board — *88.80%*

PROJECTS

SyncBoard – Collaborative Real-Time Code and Review Board — **Full-Stack Web Project**
- Developed a collaborative workspace for synchronizing code edits among multiple users using Flask-SocketIO and CodeMirror.
- Implemented role-based access for owners, editors, and viewers, along with revision snapshots and in-browser Python execution.

Technologies: Python, Flask, Flask-SocketIO, SQLite, JavaScript, CodeMirror, HTML5, CSS3

Intelligent Distributed Log Analysis and Root Cause Detection — **Final-Year Project**
- Designed a log-processing pipeline using Drain3 to parse unstructured logs and Isolation Forest to identify potential anomalies.
- Developed a dashboard concept for log analysis and root-cause investigation using FastAPI.

Technologies: Python, Scikit-learn, Drain3, FastAPI, Git

IoT-Based Home Automation System — **Research Project**
- Built a home automation prototype using ESP32/ESP8266 and relay modules to control household appliances remotely.
- Published research on the project in IJARSCT, Volume 4, Issue 3, April 2024.

Technologies: IoT, ESP32/ESP8266, C++, Relay Modules

Personal Portfolio Website — **Web Development**
- Created and deployed a responsive portfolio website using HTML, CSS, and JavaScript with GitHub Pages.

Technologies: HTML5, CSS3, JavaScript, Git, GitHub Pages

INTERNSHIPS AND EXPERIENCE

AI-ML Virtual Intern | AICTE EduSkills, supported by Google for Developers — **Jul 2025 – Sep 2025**
- Completed a 10-week learning program covering machine learning workflows, data preprocessing, and model evaluation.

Data Structures and Algorithms in C++ Intern | AICTE EduSkills — **Aug 2026 – Oct 2026**
- Practiced algorithmic problem-solving and implemented core data structures in C++.

Python Development Intern (Offline) — **Completed**
- Completed hands-on Python tasks focused on object-oriented programming, modular code, debugging, and problem-solving.

CERTIFICATIONS AND PUBLICATIONS

- Java Full Stack Developer: EduSkills Academy
- NPTEL Elite Certificate – Cloud Computing: IIT Kharagpur (60%, 4 credits)
- NPTEL Elite Certificate – Introduction to Machine Learning: IIT Kharagpur (65%)
- Cyber Security Training (30 hours): ExcelR EdTech
- Gemini Certified Student: Google for Education (valid through 2029)
- Research Paper: "Home Automation System," IJARSCT, DOI: 10.48175/IJARSCT-17258
